In December 2019, the European Commission launched the European Green Deal, a new strategy oriented at achieving the goals of the Paris Agreement, in which decarbonisation and resource-efficiency were set as the main targets to pursue. Acknowledging that climate change represents a severe threat for the society, the strategy identifies a clear opportunity as well to set the European economy on the pathway to sustainable development. The rise in the EU's climate ambition for 2030 and 2050, the Just Transition Mechanism, and the preservation and restoration of ecosystems and biodiversity are just a few elements of this strategy. However, the Commission recognises that these ambitious targets cannot be met without the engagement of the private sector. And, accordingly, among the main aims of the European Green Deal, mobilising the stakeholders and partners is the most significant.

The webinar is aimed at providing in-depth commentary on the specific actions included in the new strategy and on how these actions are going to help Europe meet the goals of the Paris Agreement, while leaving no one behind.

**Presenter:** Riccardo Christopher Spani holds a Bachelor degree and a Master degree in Economics from University of Rome La Sapienza. He is a Researcher at Fondazione Eni Enrico Mattei.

**Speaker:** Mauro Petriccione holds a degree in Law from University of Bari and a Master degree from University of London – London School of Economics and Political Science. Currently, he is Director-General of Climate Action at the European Commission.

This webinar is part of the FEEM/DeRisk-CO project, which aims at stimulating a debate on the importance of assessing and disclosing climate-related risks and opportunities and their impact on financial performance, with a particular focus on Italian businesses.

The webinar will be held in English.
